A hand holding a pair of glasses with a patterned background. The background is a dark, textured surface with various white and light-colored symbols, including musical notes, geometric shapes, and abstract patterns. The glasses are held in a way that the lenses are prominent, and the hand is visible at the bottom. The overall color scheme is dark with light accents.

WELCOME TO BTI BIOTECHNOLOGY INSTITUTE INTERNATIONAL TRAINING PROGRAMME

We are pleased to present the new range of training courses that BTI offers for 2013. It is a multidisciplinary range of training options with the **aim of reinforcing and refreshing the knowledge of professionals in the area of oral implantology and regenerative medicine.**

At BTI, training is one of our basic pillars and for this reason, we dedicate a lot of resources to creating a wide range of courses and training sessions, including the continuous training programmes, general or specialised clinical stays and international congresses. **We already have 25 years of experience in training,** having created the first post-graduate course in this area of medicine.

Our objective every year has been to constantly improve the courses, whether by introducing the latest technology into the classrooms to bring the clinic closer to the students, or by renewing, year after year, the subjects of the different courses.

BTI training is aimed **at doctors, auxiliary staff and hygienists.** In short, all professionals who want to update and exchange their knowledge, not only by means of conferences and theory, but also through interaction with specialists.

One of the most requested training subjects for the last years has been **PRGF®-Endoret® technology for tissue regeneration, in the field of oral surgery and other specialisations.** Therefore courses on the application of PRGF®-Endoret® are included within the range of training we offer.

The training is held at the **BTI Postgraduate and Training Centre, which has the most advanced medical and audiovisual technology,** making it a European leader in this field. This centre has an **excellent multidisciplinary team comprising professionals with extensive experience** in clinical practice and training.

CONTINUOUS TRAINING

Theoretical and practical training programme that will enable the students to develop their knowledge in oral implantology from the most basic level to the most advanced surgical techniques. It is aimed at doctors, auxiliary staff and hygienists, thus training the whole clinical team in parallel. The complete continuous training package consists of 4 courses: Introduction to predictable implantology, Practical tutorials, Advanced techniques: Advanced surgery and techniques: Prosthesis.

Class language: Spanish

SPAIN

INTRODUCTION TO PREDICTABLE IMPLANTOLOGY

Level · INTRODUCTORY

25 FEBRUARY - 1 MARCH / 23-27 SEPTEMBER · Vitoria

Theoretical and practical training providing an introduction to surgical basics, tissue regeneration and the design and selection of prostheses. Includes a one-day module on PRGF®-Endoret® for auxiliary staff.

Aimed at: Odontologists, stomatologists, maxillofacial surgeons, auxiliary staff and hygienists that are starting out in implantology.

Duration: 5 days (full time)

PRACTICAL TUTORIALS

This training method aims to consolidate all the surgical concepts that the student has learned during the five intensive sessions of the "Introduction to predictable implantology" course.

ADVANCED TECHNIQUES IN SURGERY

Level · ADVANCED

17-18 MAY · Vitoria

8-9 NOVEMBER · Madrid

Theoretical course on advanced surgical techniques in the treatment of atrophic maxilla.

Aimed at: Odontologists, stomatologists and maxillofacial surgeons.

Duration: 2 days

ADVANCED TECHNIQUES IN PROSTHESES

Level · ADVANCED

12-13 JULY · Vitoria

13-14 DECEMBER · Madrid

Theoretical course on advanced techniques in partial or complete prostheses; indications for immediate loading and solutions for atrophic maxillae.

Aimed at: Odontologists, stomatologists and maxillofacial surgeons.

Duration: 2 days

POST-GRADUATE IN IMPLANTOLOGIA BIOLOGICAMENTE GUIDATA

Aimed at: Odontologists, stomatologists and maxillofacial surgeons that are starting out in implantology.

Location: San Luigi Orbassano University (Turin)

Duration: 2 days per MODULE

Language: Italian

MODULE 1: 22-23 MARCH

MODULE 4: 14-15 JUNE

MODULE 2: 12-13 APRIL

MODULE 5: 12-13 JULY

MODULE 3: 24-25 MAY

MODULE 6: 13-14 SEPTEMBER

CONTINUOUS TRAINING

MEXICO

IMPLANTOLOGY AND ORAL RESTORATION

Aimed at: Odontologists, stomatologists and maxillofacial surgeons that are starting out in implantology.

Location: BTI Training Centre. Mexico DF.

Duration: 1 day per MODULE.

CLINICAL STAYS

SPAIN

These are forums for updates in surgical techniques and sessions for sharing clinical experiences. The aim of these intensive courses is to reinforce and consolidate the participants' knowledge in the main areas of implantology, through live surgeries in the operating theatre and conferences. Similarly, the participants will learn about and update their knowledge on the protocol, practice and applications of PRGF®-Endoret®.

AIMED AT

GERMAN, ENGLISH, GREEK
AND AMERICAN DOCTORS

Class language: English

DATES

15-16 April
17-18 June
8-9 July
16-17 September
14-15 October
11-12 November

JAPANESE DOCTORS

Class language: Japanese and English

18-19 March

Class language: Spanish

10-12 June
28-30 October

EXPERTISE SESSIONS

Conferences intended for professionals who would like an in-depth update on various current issues in dental medicine. These courses are given by speakers with international prestige, who will expound the latest trends in a variety of disciplines within oral implantology.

Language: Spanish

ADVANCED TECHNIQUES IN MUCOGINGIVAL SURGERY

Level · ADVANCED

19-20 APRIL · Vitoria

4-5 OCTOBER · Madrid

Course given by Dr. F. Fombellida with the aim of imparting the knowledge necessary for predictable mucogingival surgery, with emphasis on the biology of the periodontal and peri-implant tissues, demonstrating the appropriate techniques for development and continual improvement in day-to-day practice.

BTI IMPLANT SYSTEM

General interest educational modules, where the students will be trained in disciplines that are useful in today's odontology. Participants will receive training on the basic principles of BTI's work philosophy.

During the course there will be conferences given by BTI staff on both prosthetic and surgical solutions, and in addition there will be practical lessons linked to the topics covered in the lecture, in order to strengthen the concepts presented.

Class language: Spanish

** For further information contact your area representative, who will provide detailed information.*

Specialised courses of high interest for the professional in areas that complement dental knowledge.

Language: **Spanish**

COURSE ON TEMPOROMANDIBULAR MALFUNCTION AND OCCLUSION

DATE PENDING · Vitoria

Theoretical and practical course offered in collaboration with the Teknon medical centre in Barcelona for the early diagnoses and treatment of the temporomandibular pathology.

4 MODULES aimed at odontologists and stomatologists.

Duration: 2 days

PRGF®- Endoret® TECHNOLOGY AIMED AT AESTHETIC MEDICINE

8 FEBRUARY / 10 MAY / 5 JULY / 18 OCTOBER · Vitoria

Theoretical and practical course on the biological grounds and the protocol for obtaining PRGF®-Endoret®, so that the aesthetic doctor can become familiar with the technology and find out how it can help combat the signs of ageing by improving the appearance of the skin.

Aimed at: Professionals in the field of aesthetic medicine.

Duration: 1 day

CONTINUOUS TRAINING COURSE IN PRGF®-Endoret® TECHNOLOGY For odontologists and stomatologists

Level · INTRODUCTORY

8-9 MARCH · Vitoria

20-21 SEPTEMBER · Seville

Theoretical and practical course in collaboration with the University of Seville aimed at accrediting the training of odontologists and stomatologists in the preparation of the PRGF®-Endoret® technology, and its application within dental medicine.

COURSE ON FACIAL REJUVENATION WITH THE USE OF PRGF®-Endoret® technology. For odontologists and stomatologists

14-15 MARCH / 27-28 JUNE / 26-27 SEPTEMBER · Vitoria

25-26 April* / 7-8 NOVEMBER* · Vitoria

Theoretical and practical course on cosmetic dermatology in the orofacial area and the applications of PRGF®-Endoret® in this field. Practical sessions on the diagnosis, planning and aesthetic treatment of patients.

Duration: 2 days

* International · Language: English

PRGF®- Endoret® TECHNOLOGY AIMED AT CHIROPODY

31 MAY · Vitoria

Theoretical and practical course with the aim of sharing how PRGF®-Endoret® technology can aid the chiropodist in daily practical. It will cover its application in tendonitis, metatarsophalangeal arthrosis and numerous surgical procedures.

Duration: 1 day
