

CLINICAL SUPPORT

BTI APNiA

Through this service, provided by **the sleep unit of the Anitua Dental Clinic**, we provide support when analysing the patient's data collected by the **APNiA** device, and when interpreting the report and deciding on the best treatment for each particular case.

To receive this support, you can send the data recorder in the sleep test carried out with the **APNiA** device, and the questionnaires with the patient's clinical data, to the e-mail address casos@apnia.es

To send the study, it must be compressed in zip format. Remember that each sleep recording is compressed into one zip file, therefore you must send as many compressed files as there are recordings.

Once we have received the sleep tests recorded by APNiA and the patient data in the questionnaire, our **Sleep Unit** will carry out an exhaustive manual analysis of it, generating a report of the results and establishing a number of treatment recommendations.

The service includes the full diagnosis of 6 patients until each and every one of them has their sleep pathologies stabilised. The cost of this service is **€720**. Once the pack of 6 patients has come to an end, if you need to analyse a new sleep test, you can purchase another diagnostic pack for 6 patients.

For further information, do not hesitate to consult us.

Best regards,

Interdisciplinary Sleep Disorder Unit
