FACIAL REJUVENATION
WITH THE USE OF ENDORET®
(PRGF®) TECHNOLOGY
COURSE

2018

ENDORET® (PRGF®), PIONEERING TECHNOLOGY WITH CLINICALLY PROVEN EFFECTIVENESS

A growing aesthetic awareness means that the interest in developing new products to help us improve the appearance of our skin has increased, and the application of plasma rich in growth factors, Endoret® (PRGF®), is currently becoming established as one of the most in-demand anti-ageing treatments.

Endoret® (PRGF®) has the capacity to restore the vitality of skin by increasing its moisture, helping to recover its ideal pH, and triggering a series of key biological effects in the repair and regeneration of tissues. The result of the treatment is healthier, more moisturised and brighter skin, acquiring a younger look that lasts over time.

More than 500,000 patients around the world have been treated with Endoret® (PRGF®) without any adverse effects being reported.

The objective of this course is to familiarise health professionals with the Endoret® (PRGF®) technology, for its effective application in the treatment of facial ageing and capillary conditions.

In addition, the course will cover techniques to ensure effective communication with patients, always guiding them in a way that increases their satisfaction, thereby increasing their loyalty to the treatment.

There will also be practical exercises in the obtaining of Endoret® (PRGF®) and its subsequent clinical application.

GENERAL INFORMATION

Venue

BTI Training Centre
Eduardo Anitua Institute
C/ Jacinto Quincoces 39
01007 Vitoria-Gasteiz (Álava) España

Training (dates):

26 october
Check dates:
Tel.: 945 16 06 52
training@bti-implant.es

Schedule

9:00h - 18:00h

Registration fees

BTI course
(includes coffee break and lunch)

Reserve your place

Biotechnology Institute, SL.
Tel. contacto: 945 16 06 52
Fax: 945 15 89 34

COURSE PROGRAMME FACIAL REJUVENATION ENDORET® (PRGF®)

- 09.15** Welcome and **presentation** of the BTI course.
- 09.45** Biological principles of Endoret® (PRGF®).
Relevant scientific-technical and legislative aspects.
- 10.30** Clinical application of Endoret® (PRGF®) in aesthetic medicine.
- 11.45** Coffee break.
- 12.00** **Global aesthetic treatment:**
Combination of Endoret® (PRGF®) with other treatments.
- 14.00** Lunch.
- 15.00** Effective communication with the patient.
- 16.00** Marketing tools.
- 16.30** **Practical session** on the obtaining/application of Endoret® (PRGF®).

NOTE: The use of photographic and video cameras and all other devices for recording or filming is forbidden during the course.

TEACHERS

BIOTECHNOLOGY INSTITUTE

Dra. Cristina García-Millán

M.D

- Degree in Medicine and Surgery. Madrid University
- Specialist in Dermatology and Venereology
- Professor of Aesthetic Dermatology post-graduate courses in Alcalá de Henares University
- Wide experience in botulin toxin, fillers and facial rejuvenation
- Member of the Spanish Academy of Dermatology and Venereology (AEDV)
- Member of the Spanish group of Cosmetic Dermatology (GEDCT)

Dr. Pedro Heredia

PhD

- PhD in Biochemistry and Molecular Biology. University of the Basque Country
- Research Assistant at Imperial College London
- Professor of post-graduate course of Biomedical Engineering at University of the Basque Country
- Principal Researcher in many international projects in Dermatology, Oncology and Nanotechnology

BTI RESEARCH AND SCIENTIFIC RIGOUR

HUMAN TECHNOLOGY

We have been carrying out research since the 1990s, always following a **rigorous scientific method** with a clear multidisciplinary approach, achieving **important results that have been published in the most prestigious scientific journals at international level**. Part of our mission is the transfer of our knowledge and innovation to the professionals who we work with.

IMPORTANT: BTI Biotechnology Institute reserves the right to change the instructors of the courses organised throughout 2018 depending on their availability.
